

Global Water, the City of Covina's water billing company, **covered all costs, design and installation labor** to retrofit the City Hall fountain. The new fountain features a low water use design, including low water plantings, LED lighting and educational messages related to water use.

The primary message on the Cantera stone ball which is the centerpiece of the water feature is a quote from Leonardo Da Vinci, ***"Water is the driving force of all nature."*** Additional educational messages are still being drafted.
